

ALLEN NAKALEMA

Software Engineer | Python & Django | AI Applications

Kampala, Uganda • allennakalema06@gmail.com

github.com/allennakalema06-web • linkedin.com/in/allen-nakalema-99b8373aa/

PROFILE

Software engineer with hands-on experience building Django applications, translating business requirements into working features, and collaborating on backend development. Built an inventory and sales system with role-based access, pricing rules and reporting; also contribute to open-source projects. Currently studying Software & AI Engineering at Turing College and developing an AI practice coach for a Ugandan Sign Language learning platform.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS

Frameworks & databases: Django, Django templates, PostgreSQL, SQLite

Development: Git, GitHub, unit testing, debugging, authentication, REST API integration, Agile

Tools & deployment: Render, VS Code, Git Bash; cloud fundamentals

PROJECT EXPERIENCE

Nyondo Stock System | Full-stack developer | 2026

- Built a Django application for hardware inventory, supplier records, sales, customer deposits and business reporting.
- Implemented role-based access for administrators, managers and sales attendants, including customer-specific pricing and delivery-charge rules.
- Designed database models and business logic, debugged workflows and configured deployment using PostgreSQL and Render.

UgSL AI Practice Coach | AI coach developer, team project | 2026–Present

- Developing the AI practice-coach component of a Ugandan Sign Language learning platform to support practice alongside video lessons.
- Responsible for the AI coach workstream and its API integration design with the team's backend and frontend; project in development.

ParkEase | Django backend developer, team project | May 2026

- Worked with Rose on Django backend development for a collaborative parking application.

FOUNDER & OPEN-SOURCE EXPERIENCE

Allen Pearl Naturals (APN) | Founder & product builder | Jan 2025–Present

- Founded a wellness venture, beginning with digital publishing and creating The Ultimate Guide to Natural Healing.
- Built an early website and ebook shop, with additional titles in development; continuing to develop the venture before public launch.

Open Data Ensemble | Open-source contributor | 2026

- Contributed to a registration form by updating JSON schema, UI configuration and field labels.
- Used Git-based workflows and ran form validation and frontend build checks.

EDUCATION & TRAINING

Turing College | Software & AI Engineering | Jul 2026–Present

Project-based study in programming, APIs, testing and AI application development; studying while at Groundbreaker Talents.

Refactory Academy | Computer Science Essentials with Python | Completed Jun 2026

Completed through Groundbreaker Talents. Training included Python, Django, HTML/CSS, Git, debugging, cloud fundamentals, Agile, human-centered design and application security.

Groundbreaker × Spiro Academy | IoT & Embedded Systems | Sep 2026–Present

Studying electronics, Arduino programming and hardware–software integration.
